

NYTIMBER CREATE 99 TRUSSED RAFTERS FOR COMPLEX SELF-BUILD ROOF

PROJECT: **SELF-BUILD**

LOCATION: **COUNTY DURHAM**

NYTIMBER TRUSS ORDER VALUE: **£10,200**

TRUSSES: **99 no.**

DESIGN SOFTWARE: **MITEK PAMIR**

COMPLEXITY: **HIGH**

NYTimber, the independent timber specialist, has manufactured one of its most complex self-build roof designs to date, worth more than £10,000.

About this project

- **Engineered** to accommodate attic bedrooms, corridors, and an office, this is one of the most intricate requests the company has received.
- **Measured and designed** by NYTimber's specialist Trussed Rafter Team using the latest Mitek Software, following visits to the site in County Durham.
- **Manufactured** at NYTimber's 120,000sqft fabrication centre in Brompton on Swale where the order, which included 99 separate roof trusses, was turned around in just three days.
- **Delivered** using NYTimber's fleet of specialist roof truss wagons at a time to suit the customer.
- **Continued support** during the house's second fix, supplying bespoke Oak frame doors and Oak feature doors.

Nick Kershaw, Managing Director at NYTimber, said:

"Our design team have the combined experience of more than 100 years and are capable of creating and delivering even the most complex of roof structures."

"It has been a very interesting and elaborate project that demonstrates how far we have come as a company. We're now supplying roof trusses to national house builders, developers, and self-builders throughout the UK."

The customer, Mr. Large, added:

"A number of companies were unable to provide a quote for the project due to its complexity; however, it wasn't a problem for NYTimber, which returned an accurate and competitive quote quickly."
